PROFESSIONAL ACTIVITY

1/08/2017 to date: Surgical Oncologist at Surgical Oncology Unit, Veneto Institute of Oncology, Padua (Italy). Mainly involved in the surgical treatment of cutaneous melanoma, soft tissue sarcomas of trunk, limbs and retroperitoneum, peritoneal carcinomatosis, locoregional treatments (such as isolated limb perfusion (ILP) and cytoreductive surgery combined with hyperthermic intraoperative intraperitoneal chemotherapy (HIPEC) for locally advanced solid tumors.

EDUCATION AND TRAINING

1/10/2017 to date: PhD Student in Clinical and experimental Oncology and Immunology (XXXIII cycle), University of Padua, (Italy). Research topics: "Prognostic risk stratification for patients with rare tumours: use of predictive-prognostic models in neoplasms such as melanoma and sarcomas".

13/07/2017: Specialization in General Surgery at University of Padua Medical School (Italy) with the thesis "Recurrent retroperitoneal sarcomas: clinical outcomes of surgical treatment and prognostic factors".

2011-2017: Post-Graduate Training: General Surgery Resident (General Surgery School of Padua, Veneto Institute of Oncology). Research activity in the fields of endocrine surgery, melanoma and sarcomas.

November 2015- August 2016: Stage at Institut Curie, Paris, "Service de Chirurgie: Sarcomes et Tumeurs complexes".

14/10/2010: Medical Degree at University of Padua Medical School (Italy) with the thesis: "Hyperparathyroidism-Jaw Tumor Syndrome (HPT-JT): Genetic and Clinical Analysis of three familial groups".

1999-2004: High School: Lyceum "F. Fiorentino", Lamezia Terme, Catanzaro Humanities

RESEARCH INTERESTS AND ACTIVITY

Clinical and translational research in surgical oncology, mainly for melanoma and sarcoma, with special regards to prognostic role of single nucleotide polymorphisms of Clocks genes.

Co-investigator of multicentric, randomized trial NBTXR3: STUDIO 301: intratumoral injection of hafnium oxide nanoparticles (NBTXR3; a radioenhancer) and external beam radiotherapy (EBRT) VS only EBRT for preoperative treatment of adults with locally advanced soft tissue sarcoma.

Co-investigator of multicenter observational retrospective chart review on treatment management of Soft Tissue Sarcoma Patients (STS) Treated By Surgery with or without Perioperative Treatment.

Referring surgical oncologist for the project: Liquid biopsy in melanoma: investigating the prognostic/predictive potential of circulating melanoma cells (CMCs) and tumor DNA (ctDNA).
