

Europass Curriculum Vitae

Personal information

First name(s) / Surname(s)	Erich Piovan		
Address(es)	Via Corner 4, Monselice, Italy		
Telephone(s)	049 821 5895	Mobile:	3486513698
Fax(es)	none		
E-mail	erich.piovan@unipd.it		
Nationality	Italian		
Date of birth	12 September 1974		
Gender	Male		

Work experience

Dates	September 2005-October 2008
Occupation or position held	Post-doctoral fellow
Main activities and responsibilities	As a post-doctoral fellow at the Institute for Cancer Genetics (ICG), under the supervision of Prof. Riccardo Dalla-Favera (Columbia University) and guidance from Dr. Wei Gu (Columbia University), I participated in projects aiming at defining a novel non transcriptional function for the BCL6 oncogene and the mechanisms responsible for the pathological co-expression of BCL2 and BCL6 in human diffuse Large B cell lymphomas (DLBCL). During this period I acquired excellent expertise in protein biochemistry and in particular in protein complex purifications through tandem affinity purification.
Name and address of employer	Riccardo Dalla Favera, ICRC, 1130 St Nicholas Avenue, New York
Dates	November 2008-August 2011
Occupation or position held	Post-doctoral research scientist
Main activities and responsibilities	Joining Dr. Adolfo Ferrando's laboratory (Columbia University, ICG) has allowed me to obtain a strong background on the cellular and molecular biology of T-cell lymphoblastic leukemia. Here, I have contributed to the identification of genes and pathways that modulate the glucocorticoid response and to design strategies to overcome glucocorticoid resistance in the effort to improve treatment outcome in lymphoid tumors.
Name and address of employer	Adolfo Ferrando, ICRC, 1130 St Nicholas Avenue, New York
Dates	October 2011-to date
Occupation or position held	Ricercatore (Associate Research Scientist), Lab Head
Main activities and responsibilities	Elucidating the role of calcineurin/NFAT activation in leukemogenesis
Name and address of employer	Prof. R. Rizzuto (Rettore dell'Università di Padova)
Dates	December 2011-March 2012
Occupation or position held	Visiting Scientist in Dr. Adolfo Ferrando's Laboratory (Columbia University)
Main activities and responsibilities	Project title: "Role of AKT inhibition in the treatment of glucocorticoid resistant leukemia".
Name and address of employer	Adolfo Ferrando, ICRC, 1130 St Nicholas Avenue, New York

Education and training

Dates	1992-1999
Title of qualification awarded	Medical Degree, University of Padova, 110/110 cum laude

Dates 1999-2003
Title of qualification awarded Post graduate specialization in Oncology (Specializzazione in Oncologia), University of Padova, 70/70 cum laude

Date 2003-2007
Title of qualification awarded PhD in Oncology (Dottorato di Ricerca in Oncologia), University of Padova

Principal subjects/occupational skills covered During my PhD training in Prof. Alberto Amadori's laboratory (University of Padova; Italy), I worked on numerous projects ranging from highly immunological studies to cancer related topics. I have contributed to determining the role of Epstein Barr virus (EBV) reactivation and *de novo* infection of B lymphocytes to tumor outgrowth in Severe Combined Immunodeficient (SCID) mice injected with human peripheral blood mononuclear cells (hu/SCID), a relevant B lymphomagenesis model (Leukemia 2003). I subsequently went on to study the role of chemokines and chemokine receptors in the pathogenesis of human B cell lymphomas which arise in immunodeficient mice (hu/SCID lymphomas), demonstrating the importance of the CXCL12/CXCR4 axis in lymphoma generation in this experimental model (Blood 2005). Stemming from these observations, I went on to dissect the role of hypoxia in the regulation of the CXCL12/CXCR4 axis in malignant B cells (Cancer Res 2007).

Additional work activities June 2013 onwards
Became a doctor operating within the Italian national health service -Molecular Immunology and Oncology Diagnostic Unit of the Venetian Oncological Institute (I.R.C.C.S-IOV) of Padova. Main activity regards the evaluation of NOTCH1 mutations in chronic lymphocytic leukemia patients.

Tutoring and Teaching Tutor of three PhD students : XXVIII, XXX, XXXII cycle of the PhD course [Dottorato di Ricerca in Oncologia e Oncologia Chirurgica (PhD course in Oncology and Surgical Oncology)/ currently Dottorato di Ricerca in Oncologia Clinica Sperimentale e Immunologia] held at the University of Padova, Padova, Italy. Teacher of the course "Immunologia e Immunopatologia del cavo orale-Immunology and Immunopathology of the oral cavity" (4CFU) for the School of Dentistry of Padova University from 2013.

Financial Grants Collaborator in numerous Grants: Ricerca di Ateneo-2011-CPDA#129789 with title "Involvement of NOTCH1-regulated microRNAs and their targets in T-cell transformation"; AIRC MFAG #13053 with title- "Mechanisms of leukemogenesis induced by loss of function of WT1" and AIRC IG#14256 with title "Role of microRNAs and their targets downstream of NOTCH1 activation in T-ALL: implications for therapeutic strategies".
Principal investigator of the grants: Ministero dell'Istruzione, dell'Università e della Ricerca (MIUR) Ex60% -PRAT 2015 (CPDA #152403) with titles "Targeting the Calcineurin-GSK3 axis in T-cell lymphoblastic leukemia" and "Role of constitutive calcineurin activation in the pathogenesis of T cell acute lymphoblastic leukemia (T-ALL)".

Referee activity Referee for Dutch Foundation against cancer/ Stichting tegen Kanker; Research Foundation-Flanders (Fonds Wetenschappelijk Onderzoek-Vlaanderen, FWO) and the journals Leukemia, Haematologica, Oncotarget.

Personal skills and competences

Mother tongue(s) **Italian, English**

Other language(s)
Self assessment

Self-assessment*

(*) [Common European Framework of Reference for Languages](#)

Computer skills and competences

I have good knowledge of the most frequently used computer programs used for word processing (Microsoft word), analysing DNA sequences (Chromas, Finch TV), designing primers (Primer 3), analysing drug interactions (CalcuSyn), graphic programs (Corel Draw, Photo Shop, Illustrator, ImageJ), spread sheets (Microsoft Excell, Sigma-plot), programs used for analysing Flow cytometry data (Flowjo).

Other skills and competences

I am a particularly keen on practising sports like Tennis, table tennis and Soccer

Driving licence

I hold a B category Drivers Licence

Additional information

Reference contacts:

1) Name: **Amadori Alberto**

Title: Professor

Dept: IOV (Istituto Oncologico Veneto),
University of Padua , Italy

Phone: +39 049 8215891

E-mail: albedo@unipd.it

2) Name: **Adolfo Ferrando**

Title: Professor

Dept: Institute for Cancer Genetics,
Columbia University, New York

Phone: 212-851-4611

E-mail: af2196@columbia.edu

3) Name: **Riccardo Dalla-Favera**

Title: Professor & Director, Institute for Cancer Genetics
Uris Professor of Pathology

Dept: Institute for Cancer Genetics,
Columbia University, New York

Phone: 212-851-5273

E-mail: rd10@columbia.edu

Annexes

Please find below a list of my publications and presentations at national/international congresses

List of Publications

1. Bongiovanni D, Saccomani V, **Piovan E.** (2017). Aberrant Signaling Pathways in T-Cell Acute Lymphoblastic Leukemia. *Int J Mol Sci.* 2017 Sep 5;18(9). pii: E1904. doi: 10.3390/ijms18091904. Review.
2. Tosello V., Saccomani V., Yu J., Bordin F., Amadori A., **Piovan E** (2016). Calcineurin complex isolated from T-cell acute lymphoblastic leukemia (T-ALL) cells identifies new signaling pathways including mTOR/AKT/S6K whose inhibition synergize with Calcineurin inhibition to promote T-ALL cell death. *ONCOTARGET*, ISSN: 1949-2553, doi: 10.18632/oncotarget.9933
